

According to FCC charter Sinclair Broadcasting's plan to require their stations to pre-empt ordinary programming with a partisan documentary, just days before the election, cannot be allowed.

Sinclair uses the public airwaves free of charge, and is obligated by law to serve the public interest. It's planned broadcast is blatantly unbalanced campaign coverage, and a fundamental offense to the public's interest in free and fair elections.

The FCC must intercede to prevent its licensee, Sinclair Broadcasting, from this planned subversion of the public good. Either Sinclair must be required to give equal and comparable time to opposing views, including all parties, and especially local perspectives, or otherwise Sinclair's license must be summarily revoked.

As agents of our democratic government you will break the solemn trust inherent in your responsibilities to the American people if you fail to act in a thorough and timely manner regarding this matter.

Thank you.
